

Why (pedagogical) QFT?

- **Ample data:** Lots of online pedagogical resources for data curation
- **No tools:** Tedious yet analytically tractable calculations
- **Well-defined progression**
 - classical field theory, scalar field theory, fermions, non-abelian gauge theory, ...

Fine-Tuning & Outcome Verification

Reasoning fine-tuning is **often driven by training with outcome verifiable tasks**

You see this in open-weight trainings by:
